SUMMARY

Fresher Full-Stack (MERN) Developer who completed MERN Stack Development training at Zoople Technologies (Dec 2025 – Jul 2026). Built three full-stack projects (an e-commerce platform, a breakfast subscription app and a streaming web app) using React, Next.js, TypeScript, Node.js, Express.js and MongoDB. Hands-on with REST APIs, JWT authentication, role-based access, Razorpay payment integration and deploying apps on Vercel and Render. Seeking an entry-level Full-Stack / MERN Developer role.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js, Next.js Route Handlers, REST APIs

Database: MongoDB, Mongoose, MongoDB Atlas

Auth & Validation: JWT, HttpOnly Cookies, bcrypt, Zod, Role-Based Access Control

Tools & Platforms: Git, GitHub, Vercel, Render, Razorpay (test mode)

PROJECTS

StrideX — Full-Stack E-Commerce Platform

Next.js 15, TypeScript, Tailwind CSS, MongoDB, Mongoose, JWT, Razorpay | Live: stride-x-e-commerce.vercel.app

- Built REST APIs with Next.js Route Handlers and Mongoose models for users, products, carts, orders, addresses and wishlists.
- Implemented JWT authentication with HttpOnly cookies, bcrypt password hashing, Zod input validation and role-based access so only admins can create, edit or delete products.
- Developed order creation from the cart with stock validation, shipping-fee calculation and automatic stock update on order placement.
- Integrated Razorpay checkout with server-side HMAC signature verification before confirming orders (tested in test mode).
- Built an admin panel for order status updates, product management and a dashboard with revenue charts (Recharts); added product search, sorting and size filters.

NutriFlow — Breakfast Delivery & Subscription App (Z-Hack26 Hackathon, Zoople Technologies)

React, Node.js, Express.js, MongoDB | Live: nutriflow-rose.vercel.app

- Built a breakfast delivery and subscription app for Kochi as part of a team in a 14-day hackathon.
- Implemented OTP-based login with token authentication and a subscription checkout flow with cart, delivery address and payment options (UPI/Card).
- Developed a subscription history dashboard and a pause-delivery feature using React and Express REST APIs with MongoDB.

Netflix Clone — Streaming Web Application

React, Tailwind CSS, Node.js, Express.js, MongoDB Atlas, JWT | Live: netflix-clone-react-cm22.vercel.app

- Built a responsive Netflix-style UI with reusable React components and movie data from the TMDB API.
- Developed an Express.js backend with MongoDB Atlas, JWT authentication and bcrypt password hashing for user registration and login.
- Deployed the frontend on Vercel and the backend on Render; configured CORS and environment variables for production.

EDUCATION & TRAINING

MERN Stack Development — Zoople Technologies, Kochi, Kerala | Dec 2025 – Jul 2026

Bachelor of Commerce (Finance) — Mar Ivanios College of Arts and Science, Mavelikara, Kerala | 2021 – 2025 (Coursework completed)
